

NEOTION
Innovation Attitude

A SMART, SMALL
& GREEN DEVICE
FOR PAY-TV

 **Neotion CAM**

No additional material: plug the module directly into your TV set and use its original remote control.

Secured: embedded top-tier conditional access system combined with a high security NEOTION chipset.

Small (PCMCIA Type II size), lightweight (46g) & Low power consumption: the module can be powered directly at 5V from any DVB CI/CI Plus host.

Flexibility for continuous & cost-effective productivity with a manufacturing in Europe. A broad range of packaging for customized products.

Increase your customer satisfaction: the right diagnostic on any technical issues immediately and in an easy way.

Using a NEOTION CI Plus 1.3 CAM, create a entire HbbTV ecosystem for the best of broadcast and broadband convergence !

CI Plus 1.3 compliant

NEOTION has developed a fully CI Plus v1.3 compliant platform offering new features (VOD, Catch-up TV, channel listing, etc.) to Satellite, Terrestrial and Cable Pay-TV operators.

Multi-language

NEOTION supports more than 20 different languages such as Czech, English, Estonian, Hungarian, Kazakh, Latvian, Lithuanian, Polish, Russian, Slovak, Turkish, etc.

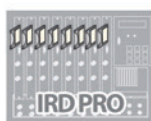

Secure OTT services

NEOTION largely demonstrated that the NEOTION CI Plus 1.3 CAM plugged into the suitable Connected TV is a secure and easy way to enrich end-user TV viewing experience.

Key ingredients: a NEOTION CI Plus 1.3 CAM embedding Specific Application Support (SAS) CI Plus resource, a Connected TV (embedding the OIPF agent, an IP built-in interface and a HbbTV browser) & a combined DRM agent with the HbbTV 2.0 in the Connected TV set.

Key benefits for Pay-TV operators: the capability to extend their broadcast linear content with value-added OTT offers without compromising security and video quality and keeping control on their protected content and subscribers.

NEOTION PRO CAM & Multi-descrambling

NEOTION PRO CAM is specifically developed for professional equipment to receive and descramble several services simultaneously, 24 hours per day and 7 days per week. This solution is suitable for establishments such as residential buildings, hotels, hospitals, etc. The PRO CAM range is available in 2, 4, 6 and more than 7 services.
