

LED EMBEDDED ON NEOTION CAM

LED on CAM, the way to improve your customer support and your operational cost at the same time

LED embedded on NEOTION CAM allows Operators to get the right diagnostic immediately.

NEOTION solution is available in 2 versions:

- For Professional environment by inserting the PRO CAM into Integrated Receiver Decoder (IRD)
- For Consumer application by connecting directly the CAM into the TV

Relevant LED status for the right diagnostic –examples:
GREEN: CAM is correctly running.
RED: Smart Card is invalid.

By integrating a bicolor LED, the NEOTION CAM displays key information both for the end-user and the operator about functional and/or technical issues in a shortest time and an easy way.

Five main status (Red & Green different configurations) to:

- ▶ Ensure a smooth first installation for your client
- ▶ Increase your customer satisfaction!
- ▶ Save your customer care service from useless phone calls
- ▶ Keep focused on real technical issues!
