OTT

OTT BY SATELLITE
FOR ENHANCED
EXPERIENCE

Enhanced Quality of Experience

- Offer Live TV content with low-latency video streaming for real-time broadcasting.
- Overcome congestion network by avoiding any buffering issues, video starting latency or failure.

Minimize impact on your infrastructure

- Leverage existing Broadcast network to deliver linear OTT Pay-TV & Push VOD contents everywhere while keeping same Quality of Service.
- Capitalize on existing encoder & IP packager standard (MPEG-DASH & HLS) combined with DRM protection to display any audio, video and data on any mobile device.

Personalized solution

- Local video content and Push Notification/Pop-up for custom advertising, alerting and information.
- Suite of specific tools helping to fully manage the gateway and the subscribers, using less than 100kps Internet connection.

MPEG-DASH & HLS *Low-latency* **PUSH VOD**
Push Notification **Mobile Phones & Tablets** **HDD**
Live TV Streaming **Wi-Fi** *Rights Management*
DRM Agnostic **High-End platform** **Multiscreen**
Low Internet Bandwidth

CREATE NEW OPPORTUNITIES

Keep your subscribers addicted
